

Securely store and share team passwords

MyGlue allows you and your team to store, share, and access all of your team-based passwords in a secure and easy-to-use platform. Rather than writing passwords on sticky notes, sharing them through unsecured emails, or creating a support ticket for yet another forgotten password, you can simply access team passwords in the browser, the web app, and the mobile app.

Why MyGlue?

- Keep track of your team-related passwords and say goodbye to those ridiculous sticky notes
- Effortlessly share one or more passwords with your team or select team members
- Easily access team passwords on any webpages using the Chrome Extension and on the go from the MyGlue Mobile App
- Stop wondering who's got the latest version of a password! Data stored in MyGlue is always live and up to date
- Airtight security: SOC 2 compliance, role-based permissions, audit trail, version history, two-factor authentication, and more

At-a-Glance Benefits

- Centrally store, share, and access team passwords
- Airtight security
- Access passwords from the web app, mobile app, or on any webpages using the Chrome Extension

Why MyGlue?

- Collaborate easily
- Turn individual knowledge into business knowledge
- Centralize team information
- Increase overall efficiency
- Streamline processes
- Tighten cybersecurity
- Immutable audit trail
- Complete revision history
- SOC 2 compliant

Getting Started

Ask your IT provider for more information about deploying MyGlue at your organization, or visit the MyGlue help page for step-by-step guides to getting started with documenting passwords and standard operating procedures.
